KELVIN SCHOUTEN

QUANTITATIVE FINANCE / MATHEMATICAL MODELLING / SIMULATION

Dussen, Netherlands | +31 6 3157 0510 | schoutenkelvin@gmail.com

PROFILE

MSc Quantitative Finance student at Tilburg University with a BSc in Mathematics and experience developing mathematical models for industrial applications. Combines quantitative analysis and numerical simulation with research and teaching experience.

EDUCATION

MSc Quantitative Finance 2026–present
Tilburg University

BSc Mathematics 2022–2026
Utrecht University

INDUSTRIAL MODELLING PROJECT

Two-phase flow modelling for industrial pipe cleaning 6-month project
Independent project commissioned by a company | Food-industry applications

- Developed a mathematical model of two-phase flow in pipes to estimate system requirements and cleaning effectiveness across different flow regimes.
- Used simulations to estimate unknown model quantities and examine behaviour under varied flow conditions.
- Extended the model to cover different industrial operating scenarios.

TECHNICAL SKILLS

Programming: Python

Modelling & simulation: Mathematical modelling, two-phase flow, numerical simulation, parameter estimation

Research & analysis: Statistical analysis, quantitative data processing, research reporting

ADDITIONAL EXPERIENCE

Research Assistant 2020–2021
The Hague University of Applied Sciences

- Analysed student data on academic performance and gender differences; reported and presented the findings.

Private Tutor 2017–2025
Altena College and independent tutoring

- Provided mathematics and physics tutoring, created tailored exercises, and monitored student progress.

Postal Deliverer 2017–2020
PostNL

- Managed scheduled delivery routes and kept delivery records up to date.
